FABRICATOR OF ENTRANCE AND CAB SILLS

SILLSKIN® Patented Elevator Sill Solutions

SILLSKIN® by Archi-Tread®, Inc. is a revolutionary **patented** elevator sill cladding system for building owners and contractors who value durable premium finishes and their budget. Archi-Tread® is the first and only company created to focus strictly on elevator sills. The owner with over 30+ years in the elevator industry listened to the repeated requests from architects, owners, contractors and designers and introduced SILLSKIN® cladding systems which provides **cost effective solutions** to every day challenges.

Product Lines:

SILLSKIN® Modernization Cladding: A field installed overlay onto the existing entrance sill. Providing a premium finish at a cost effective price. Typical installation is completed within hours by an Archi-Tread® authorized and trained mechanic. No longer is there a need to chop out the existing sill.

SILLSKIN® Construction Sill & Cladding: The solution for **new construction projects** to ensure the elevator sill finishes are in pristine condition at turn-over. A pre-engineered extruded aluminum base sill is furnished by Archi-Tread®, Inc. which is installed by the elevator contractor during the elevator installation phase. Once the heavy building construction is completed an Archi-Tread®, Inc. authorized and trained mechanic field applies the SILLSKIN® cladding. Providing a sill in pristine condition at turnover.

FURNISH NEW Sills: A **low cost option** to fully extruded premium finish sills by utilizing an extruded aluminum base and a SILLSKIN® cladding in the approved finish of choice. SILLSKIN® Entrance and Cab sills are factory designed and fabricated to match each job specifications. SILLSKIN® Sills are shipped to and installed by the elevator contractor.

ALUMINUM Sills: With our customized machinery and tooling, we can provide those aluminum sills that one can't simply find. We now have the capability to provide aluminums sills in multiple speeds, profiles and in unlimited widths and lengths.

HEATED Sills & Drains: Designed to prevent build up of ice and snow. Each sill contains a full-length custom designed heating element and temperature sensor. All controlled by a state-of-the-art digital controller. These systems are UL approved. The heated sills can also be incorporated into a sill drain.

APPLICATION

Modernization
Finish Upgrades
Adding to or raising existing floors
New Construction
Damaged sill
Worn sill groove

BENEFITS

Lowest Cost Premium Finish Sill Available
Match SILLSKIN® finish to entrance frame or cab finish
Custom finishes and alloys available
Fast Delivery

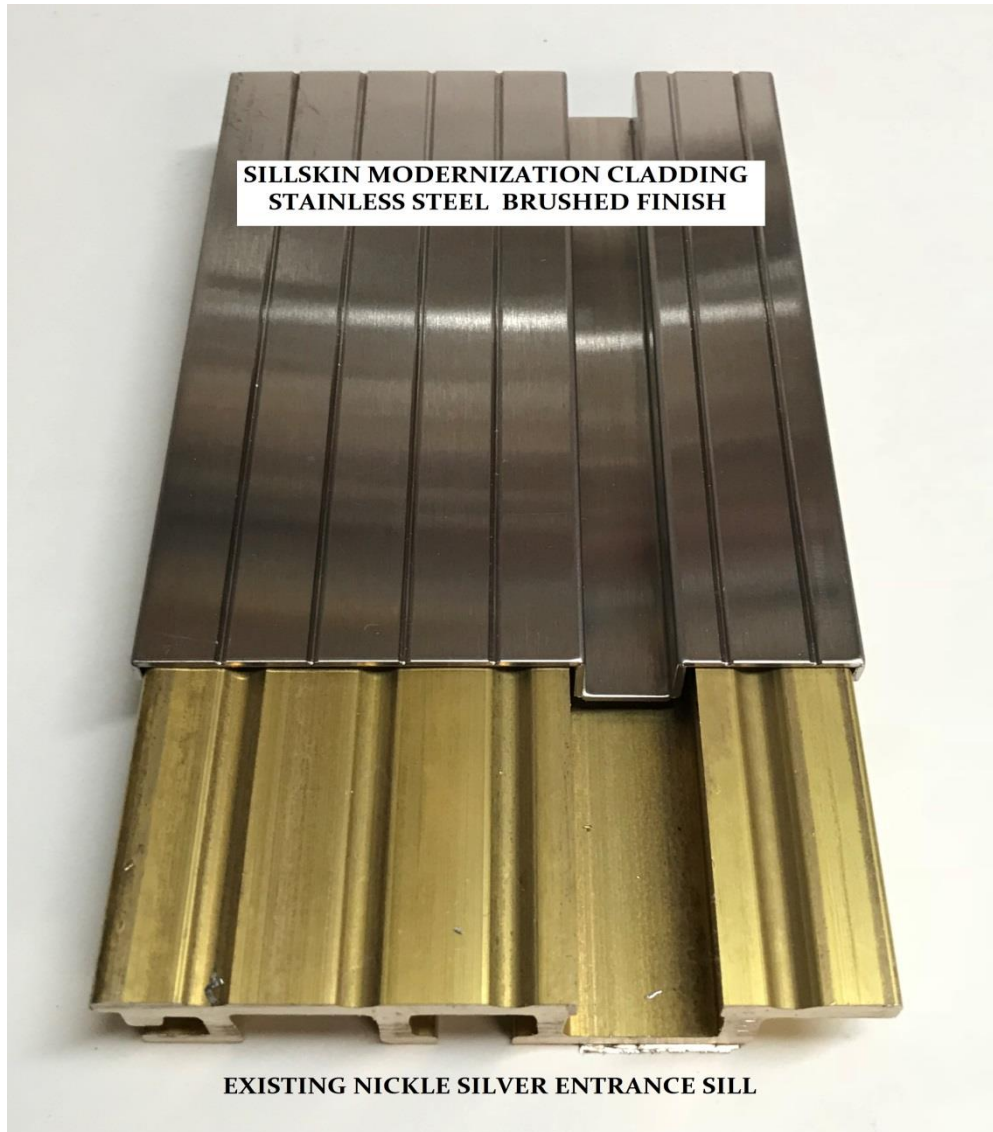

SILLSKIN® Modernization Cladding:

- No disruption or damage to existing flooring or frame
- Seamless integration with existing door assembly
- Reduced installation time (from 2 days to a few hours)
